			Services Providers
□Employment	⊠Independent	⊠Students	⊠Interns
Services Provider	Contractors		
Agencies			
⊠Volunteers	☐Persons Served		

POLICY:

Lapeer County Community Mental Health (LCCMH) maintains the integrity of information stored in the Optimal Alliance Software Information System (OASIS) while allowing staff the opportunity to make corrections and possible deletions in the electronic health record.

STANDARDS:

- A. Any corrections of erroneous entries in OASIS must be made in accordance with the requirements defined by this policy. Entries to the electronic health record will be maintained and inaccurate information will be accessible and changes to the information traceable.
- B. A document is considered valid in OASIS once it is signed by the staff documenting the provision of the service. Signing a document serves as authentication and adds the document as official documentation in the electronic health record.

		in the Electron	nic Health Record		

- C. Signed documents cannot be deleted from the record by the primary case holder. Staff must submit a request in OASIS to change or delete a signed document. Signed documents can be deleted by data staff by request from creator of the document, however a record of changes is kept.
- D. No changes can be made to a signed electronic document without going through the change signed document request and approval process.
- E. Documents created before 10/1/12 in a paper format but scanned into OASIS may contain corrections made by ink including a line drawn through the portion changed with the word "error" or "correction" beside the deleted section. The correction should include a date and signature of the staff who made the correction. The corrected statement may be rewritten or typed.

PROCEDURES:

Clinical Staff

- A. Reviews and identifies information in OASIS needing changes or corrections.
- B. Upon identifying a signed document for changes, clinical staff select the change signed document link next to identified document and enter the reason for changes in field provided.
 - a. If a document is identified for deletion: within the change request screen, check box stating "request this document and attached service activity log be deleted" and enter reason/rational for deletion of document. Click submit to send your request to the data queue.
 - b. If a document is identified with changes to the service activity log: within the change request screen select "request for SAL (service activity log) change" button, enter correct data and click submit to send request to data queue.

		in the Electronic Health Record			

c. If a document is identified with changes to the written information, clinical staff enter correct information and enter password to sign changed document.

Data Staff

- A. Reviews service activity log change request daily.
- B. Requests for deletion of documents are reviewed and if rationale of deletion is not defined clearly, data staff must deny request and ask for further clarification. If rationale is clear, document will be approved for deletion.

DEFINITIONS:

<u>Corrections in the Electronic Health Record (EHR):</u> A typographical error or any incorrectly documented material in the electronic case records which has been corrected.

<u>Disclaimer:</u> Documentation in the case records which has procedural non-compliance to case record documentation per policies.

<u>OASIS:</u> Optimal Alliance Software Information System – the certified electronic health record utilized by LCCMH and contract providers.
